

Neumarkter Lammsbräu

Neumarkter Lammsbräu Biodiversity Commitment for the 15th UN CBD COP-15

Taking responsibility from field to glass

Family-owned since 1800, Neumarkter Lammsbräu Gebr. Ehrnsperger KG today is lead in 7th generation by Johannes Ehrnsperger. Located in north-eastern Bavaria, our products range from organic beer to organic lemonades and organic mineral water (see NL Progress Report 2020, p. 4). Our vision is to live and work in a world which does not compromise the needs of future generations, in which 100% organic farming is the norm and people live in an intact nature while enjoying life in harmony with each other. To reach this vision each of us makes an active contribution on a daily basis, to return more to nature than we extract from it. In doing so, we inspire others to produce and enjoy 100% organic products (see NL Progress Report 2020, p. 5).

Responsibility is a core value of our corporate philosophy. For us, this entails being committed to the conservation of biodiversity within as well as beyond the Lammsbräu brewery walls.

We demonstrate our commitment to species conservation by considering the impact of our corporate activities on biodiversity beyond our operational boundary along our entire raw material supply networks, within and throughout the region. As a member of the 'Biodiversity in Good Company' Initiative we acknowledge and support the three objectives of the international "Convention on Biological Diversity": Conservation of biological diversity, Sustainable use of its components and Fair and equitable sharing of the benefits that arise out of the utilization of genetic resources (see NL Progress Report 2020, p. 3). In order to specify the measures and concrete action we take on these objectives, we commit to the following

Lammsbräu biodiversity targets until 2025

At the company premises

- Organization of planting and maintenance activities at our company orchard with trainees and employees, as well as students with special needs in our project established in 2019 in cooperation with Lebenshilfe e. V. and the landscape conservation association (see NL Progress Report 2020, p. 11-13)
- Hedge planting as well as the creation of stone heaps at the logistics site Blumenhof
- Maintenance of installed plant rondel with insect-friendly perennials, insect hotels, façade greening, and nesting boxes at company premises

In our raw material supply networks

- Implementation of two Kulturland plans (individually designed biodiversity conservation plans) with farmers of our regional farmers association EZÖB as well as awareness-raising measures in the field of Scope 3 (see NL Progress Report 2020, p. 8)
- Financial support of the follow-up project "Preserving and promoting arable wild herbs with organic farmers in Bavaria" in cooperation with the Biobauern Naturschutz Gesellschaft mbH
- Support of organic seed breeding together with our producer association
- Financial support of the "soil practitioner" training for farmers
- Future biodiversity projects in cooperation with farmers' associations from lemonade supply networks in Spain

In the region

- Financial support of soil education project at schools in the district of Neumarkt in cooperation with the LPV Nm
- Organisation of events such as the Neumarkt Round Table on Business and Biodiversity as well as excursions together with regional partners (LPV, LBV, Ökomodellregion) with the aim of creating knowledge transfer between regional and cross-sectoral companies on incorporating biodiversity in corporations (see NL Progress Report 2020, p. 14)
- Establishment of regional humus-building projects on farm-owned arable land

Beyond the region

- Offset part of our unavoidable CO2 emissions through a biodiversity project in Pará, Brazil in cooperation with Climate Partner (see NL Progress Report 2020, p. 15)

In 2020, we have placed our corporate goals in the context of the global development goals (SDGs) (see NL Progress Report 2020, p. 19-24). In subsequent years, we will transparently report on our degree of target achievement. ¹

Neumarkt i.d.OPf., September 2021
